

Thinking about... music!

I like pop music and I am a good singer. I can't concentrate on other things when I am listening to music. I can read lyrics. I enjoy while watching music videos. I don't like all kinds of music. I hate folk. I like singing karaoke and I sing it every day. I spend more than two hours listening to music every day.

Also, I sometimes listen to music while I am doing my homework. I always sing in a shower. I was at many music competitions and many concerts. I don't mind singing in front of other people. When I listen to music I feel happy and music makes me feel better if I am in a bad mood. I have many CDs.

World would be empty and sad without music. My favourite songs are: Best Song Ever, Story Of My Life, Move... and much more. I like these songs because they are perfect and their lyrics are easy to learn. I've heard those songs this year. The bands that sing these songs are: One Direction and Little Mix. I like to sing these songs and many more. The last CD I bought was Take Me Home (tour).

I prefer English songs because I think they have much more interesting songs and I can learn English. In Croatia you have only love songs. My favourite group is the biggest boyband on the planet: One Direction. I think that a song is more popular if the music videos are funny and interesting. I like to create a (mix) CD for my best friend. If I would have a band we would play all types of music except folk.
